

Our Mission

To build lasting partnerships with communities and industry professionals all seeking one common goal: customer satisfaction. AMS, Inc. is dedicated to providing a construction staff that is responsive, efficient and professional so that all needs are completed and met with a superior level of service.

"Driven by Service, Fueled by Customer Satisfaction"

The Partnership Solution

Managing communities is a complicated responsibility that requires big picture thinkers to also manage small day to day tasks that arise with the expectation of never allowing the two to get in the way of each other. With decades of experience working in HOA's, the team at AMS recognizes both hats that community managers are expected to wear and promise to be a valuable resource and business partner in creating solutions for those big picture and day to day tasks. Our amazing office staff and experienced and honest service technicians are trained to handle the small work orders with the same service and respect as larger rebuild projects so that our customers can stay focused on their big picture responsibilities. Our team is ready to be an extension of yours so that when we show up to your job site, we represent you in the best way possible.
