SPECIALIZING IN SIDEWALK SAFETY

Advantages of Concrete Shaving

- Creates a safe, attractive, ADA transition that allows access for individuals with disabilities
- Effectively removes the dangerous trip hazard
- Does not scratch the concrete like grinding
- We turned this dangerous trip hazard into a ramp that provides access (per ADA specs)
- Competitively priced (why use anyone else?)

Why We Never Grind

- Grinding is not usually ADA compliant
- It's an eyesore
- Scratches the concrete
- Frequently, the adjacent panel is also scratched

WE NEVER GRIND

LOOKS TERRIBLE!
