

# TRUSTED ENVIRONMENTAL REMEDIATION

## CORONAVIRUS RESPONSE

Unexpected catastrophes can strike anytime, anywhere. With the increased concern of COVID-19 rising within our communities, it has become a paradigm shift in how people interact and we should address the health of our facilities moving forward.

**During this time of crisis HARBRO's trained crews are ready to respond to our clients' facility to apply highly effective, EPA registered, ecofriendly disinfectant to restore safety and confidence back into their property.**

With **HARBRO** as part of your company's solution to recover from unpredictable disasters like the current pandemic, you have a partner you can depend on when you need it most.

The U.S. Centers for Disease Control and Prevention (CDC) is responding to an outbreak of respiratory illness caused by a novel (new) coronavirus or COVID-19. Declared a public health emergency, it continues to spread globally and within our backyard, raising fears over contagion and confusion over appropriate containment strategies.

Current evidence suggests that novel coronavirus may remain viable for hours to days on surfaces made from a variety of materials. Cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in communities and high traffic settings.

When it comes to disinfecting properties, being thorough and detailed can greatly impact the overall outcome. HARBRO project managers have years of experience-based knowledge to ensure proper safety protocols for applying disinfectants.

We are ready to help clients address viral outbreaks with a custom disinfecting plan for their business continuity solution. We will ensure to get the job done right for the wellbeing of employees, tenants, and visitors. Let us bring peace of mind and regain confidence to your team and tenants at your property.

**You Can Count On Us to Get the Job Done Right.**

## Our Mission

Our mission is to provide victims of disaster with immediate restoration services with the utmost integrity, dedication to quality, and outstanding customer service.

# PROTECTION AGAINST VIRAL OUTBREAKS

During this time of the COVID-19 pandemic, places of business will require thorough cleaning and disinfecting in order to stop the spread of germs and viruses.

HARBRO can provide application of a disinfectant on a onetime, weekly, or monthly basis. We use disinfectants that are EPA registered virucides, known to kill 99.99% of bacteria. Products we use can inactivate many of the common virus strains found even in hospitals.

Our trained and experienced crews will apply disinfectant to your properties down to the detail level you wish to accomplish.

This will give you, your staff, tenants and guests at your property peace of mind when they see that you are taking a proactive approach during this crisis.

## Scope of Work for Disinfecting Services

- ✓ Facility should prepare for disinfecting by clearing areas of clutter, allow space to be unoccupied for at least 24 hours.
- ✓ We will use disinfectant products that are known to be used in most hospitals and schools. These products can inactivate various viruses.
- ✓ We will inspect all personal and protective equipment (PPE) before entering facility.
- ✓ Application of disinfectant at specified facility.
- ✓ Apply a disinfectant in accordance to the master label directions.
- ✓ Remove and properly dispose of all used cleaning materials. Including towels, gloves, eyewear, wash cloths, sponges and mops.
- ✓ Technicians discard all disposable cleaning materials used to clean contaminated areas in applicable biohazard disposable bags.
- ✓ Bagged of hazards are transported and disposed of properly off site by our trained personnel.
