The Malagon Experience

Transforming Landscapes, Nurturing Nature, and Protecting the Planet for Future Generations.

At Malagon Legacy Landscaping, we specialize in comprehensive landscape management solutions. Designed to enhance the beauty, health, and sustainability of every property we maintain. From precision irrigation and water management to year-round maintenance and landscape enhancements, our team delivers consistent quality and long-term value.

Rooted in ReScape's 8 Principles of Regenerative Landscaping, our approach goes beyond aesthetics — we focus on conserving resources, restoring soil health, and creating resilient outdoor environments that thrive with the California climate. Whether managing commercial sites, HOAs, or public spaces, we take pride in delivering landscapes that leave a lasting impression while protecting the planet for future generations.

Our Services

Landscape Maintenance

We provide comprehensive year-round landscape maintenance designed to nurture healthy, thriving outdoor environments. Our trained and certified professionals deliver consistent, detail-oriented care — from turf management to seasonal pruning — ensuring every property remains vibrant, safe, and visually appealing throughout the year.

Landscape Enhancement

Our enhancement services bring lasting value and beauty to your property. From refreshing outdated planters to implementing large-scale upgrades, we transform outdoor spaces through thoughtful design and sustainable improvements. Every enhancement project is tailored to your community's vision, elevating both aesthetics and function.

Irrigation & Water Management

Our irrigation services are focused on maximizing efficiency and optimizing landscape performance. We conduct routine inspections, system audits, and proactive maintenance to detect leaks, adjust scheduling, and ensure consistent coverage. The result is a reliable, water-efficient system that lowers costs and promotes sustainable landscape practices.

Sustainable Landscaping

Sustainability drives our approach to every project. Inspired by ReScape's 8 Principles of Regenerative Landscaping, we build and maintain landscapes that are healthy, efficient, and environmentally conscious. By focusing on soil health, native plants, and smart resource management, we create outdoor spaces that thrive naturally while conserving water and reducing long-term maintenance needs.

Plant Health Care

Our Plant Health Care program focuses on the long-term vitality and resilience of your landscape. Using an ecosystem-based approach, we combine proactive monitoring, soil testing, and natural pest management to promote strong, healthy plant growth. The result is a thriving, balanced landscape that stands the test of time.
