## SECURITY SERVICES

### What sets Nordic Security Services apart?

#### Outstanding people

With over forty years of combined law enforcement and security experience, Our President, General Manager, and Operations Manager draw on their seasoned backgrounds and exacting standards to position Nordic a cut above. Our demanding hiring criteria and intensive training ensure that Nordic's officers rank among the finest in the industry.

#### Powerful communication technology

While some firms rely on offsite answering services and voicemail, Nordic coordinates its operations from a 24-hour in-house Dispatch Center. State-of-the-art systems are linked to sophisticated field equipment, keeping officers in instant communication with Nordic supervisors, property managers and owners, residents, local police, and fire personnel across a hundred mile radius.

**Named one of the Top 10  
Private Patrol Operators  
in Orange County by the  
Orange County Business Journal**

#### High-profile command presence

A visible, professional image is the first step to effective security. Our patrol vehicles are marked and equipped to comply with State regulated guidelines, and display our 24-hour Dispatch Center 800 number. We can provide both random patrol service and dedicated patrol units bearing your company or association name.

#### Gated Community Specialists

We install proprietary gate access software that enables our entry posted officers to provide unsurpassed protection as they expedite clearance of residents, guests, and vendors.

#### Premier Parking Enforcement

Our proprietary computerized vehicle tracking system allows us to provide reliable, consistent parking enforcement services custom-tailored to your existing regulations. We can also help you design and implement a superior parking control program. You can choose to receive comprehensive reports of our activities — vacation monitoring, safe listing, hot listing, citations, towed vehicles, field observations and more — on a daily, weekly or monthly basis.

# nordic systems integration

#### One-source integrated services

Nordic has the broad-spectrum expertise to handle a full range of sophisticated security system applications, including access control and monitoring, intrusion detection, closed circuit TV and video monitoring, surveillance, wireless, gated entry, barrier arms and directory units.
