

What ICS4S can provide to your community:

- * Pre-fire planning
- * Organizing community members before a disaster hits.
- * Planned evacuation routes within communities.
- * Mapping out evacuation routes and target hazards
- * A **PATENTED**, notification mobile app with pinpoint, instantaneous reports.

Identified routes of travel for emergency evacuation with a picture of the exact location to exit

Whether you're using our **PATENTED**, instantaneous, pinpoint, emergency notification mobile app or relying on pen and paper, our ICS4S teams have trained numerous organizations on best techniques used by firefighters. Simply said....you're covered!
