

Put an End to Wasteful Plumbing Corrosion

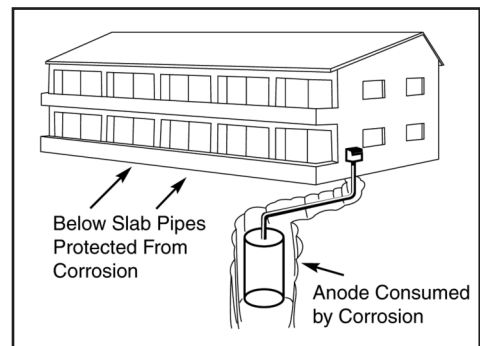

CATHODIC PROTECTION:

For Slab Leak Problems (soil-related corrosion)

- An electrical process used for corrosion control. Guaranteed to drastically reduce or eliminate ongoing slab leak problems.
- Thousands of units protected.
- Proven alternative to re-plumbing at a fraction of the cost.
- NO DISRUPTION TO RESIDENTS.

Cathodic Protection

The alternative to slab leaks and costly repairs

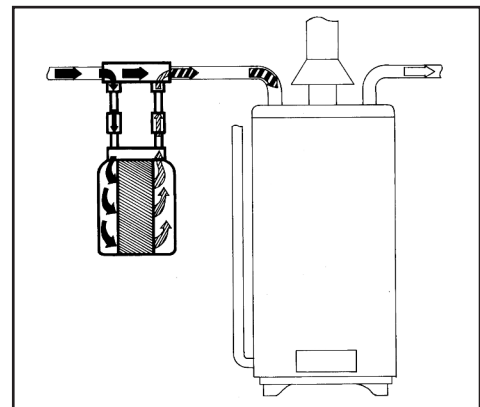

WATER TREATMENT:

For Pinhole Leak Problems (water-related corrosion)

- A widely used and accepted method of controlling scaling and corrosion of domestic plumbing system. Proven effective with over 40 years of application.
- Extends the life of entire plumbing system, including boilers, hot water heaters, solar and fixtures.
- Recommended by the U.S. EPA Safe Drinking Water Act.
- Re-plumbing? Treat the cause, not the symptom, by addressing ongoing corrosion.

Water Treatment

Eliminates ongoing pinhole leak problems

FAILURE INVESTIGATION:

For Water and Gas Pipes

- Conducted by experienced engineers and corrosion experts.
- Recirculating pump sizing recommendations.
- Velocity control device installation.
- Temperature fluctuation analysis.
- Buried gas line surveys.
- Failure analysis report.
