

Plasma-Derived Therapies Educational Speaker Program

As a trusted leader with a long heritage of developing and supporting patients on plasma-derived therapies, Takeda would like to introduce a Plasma-Derived Educational Speaker Program.

Clinical Considerations of Human Albumin and Institutional Priorities Impacting its Handling and Administration

These presentations are focused on educating healthcare professionals and stakeholders within health systems on a range of topics, including the primary immunodeficiency (PI) disease state, management of PI and chronic inflammatory demyelinating polyneuropathy (CIDP), plasma supply and manufacturing, plasma-derived therapies (immune globulin [IG] and albumin therapies), and alpha₁-antitrypsin deficiency disease state. Through education, support, and trusted partnerships, Takeda aims to improve the experience, outcomes, and lives of patients in need of plasma-derived therapies.

PRESENTER*

Jerry Siegel, PharmD, RPh, BS
Clinical Associate Professor
The Ohio State University
Gahanna, Ohio
