SESHP OFFICERS 2026

*The Best in its Class
Together, we set the benchmark.*

LEADING THE FUTURE OF PHARMACY PROFESSION

To lead the healthcare landscape in 2026 is to navigate a profession where medical innovation and hands-on clinical care have finally merged into a single, high-stakes mission. The 2026 SESHP Officer Team isn't just managing the status quo—they are the architects of a new era, dismantling the silos between the Pharmacist, Nursing, Physicians, Respiratory Therapist, and the Education Partners to take patient care to unprecedented heights. The current team of officers recognizes that the future of medicine isn't found in a vacuum, but in the powerful intersection amongst all that are involved in providing the care. They are leading the charge on all fronts—clinical, operational, educational, and advocacy—to ensure these pillars of healthcare stand stronger together.

TRANSFORMING THE WAY EDUCATION IS SUPPOSED TO BE FUN & LEARN

SESHP continues to reach new horizons, anchored by our steadfast mission to provide cutting-edge clinical education in truly innovative settings. Our signature **CE at Sea** program has become a hallmark of professional excellence, and 2026 has officially shattered all previous benchmarks with a record-breaking year for attendance. This historic turnout reflects a growing hunger within the professional communities for education that matches the pace of modern medicine. This year's curriculum was more robust than ever, encompassing the latest evidence-based guidelines across a vast spectrum of disease states. Crucially, the program also included legislative updates that directly impact our daily practice. The CE sessions provided the essential legal & regulatory roadmap needed to navigate the evolving healthcare landscape. SESHP isn't just keeping up with healthcare—we are charting the course for its future.

SESHP's 25th ANNUAL MEETING & RESIDENT CE FORUM

Thank you!

SESHAP Appreciates YOUR Continued Support...

The first quarter of 2026 marked another historic milestone for SESHAP as we hosted our premier Annual Event at the prestigious Cleveland Clinic in Weston, Florida. This gathering was a masterclass in professional synergy, successfully bridging the gap between cutting-edge clinical theory and frontline practice. The program was meticulously designed to satisfy the diverse needs of our attendees, offering both high-level Consultant CE and General CE for pharmacists, alongside fully approved credits for our nursing colleagues. By bringing these two essential professions together, we created a rare environment where interdisciplinary learning wasn't just encouraged—it was the standard.

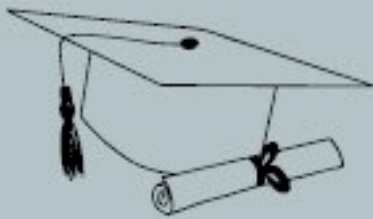

A standout highlight of the event was the opportunity for our Pharmacy Residents to fulfill a critical professional milestone: delivering their CE presentations to a room of seasoned experts. This platform not only showcases the bright future of our field but also provides residents with the high-stakes experience of educating their peers on the latest clinical evidence.

Beyond the classroom, SESHAP facilitated a high-impact forum for our valued educational partners. Over two intensive days, industry representatives engaged directly with hundreds of healthcare professionals, showcasing the latest pharmaceutical breakthroughs and cutting-edge products. This unique exchange ensures that our providers remain at the vanguard of medical innovation. By meeting our ambitious educational goals and fostering these vital professional connections, the 2026 Annual Event has solidified its reputation as the definitive launching pad for healthcare excellence in our region.
